# CLIMATE FINANCE IN 2018

ADB

Tackling climate change, building climate and disaster resilience, and enhancing environmental sustainability is a priority of ADB's new Strategy 2030. ADB is committing $80 billion in climate finance cumulatively between 2019 and 2030, and is ensuring that at least 75% of its projects will address climate change mitigation and adaptation by 2030. In alignment with major global commitments, ADB is investing in resilient and empowered communities, cleaner technology, liveable cities, and green infrastructure, to support its developing member countries' transition into low carbon and climate-resilient economies.
