

# The Finance Boss' Guide to Driving Gains & Efficiencies from JD Edwards

## The Rundown

---

As the hub for your business' transactional data, your ERP holds indigenous information that, when analyzed intelligently, can take your organization to the next level of performance heights. Experiencing such value from the ERP should be a strategic goal of any organization. This kit is specifically designed to help you get more out of your ERP ASAP.

### EBOOK

#### How to Have a Happy Upgrade

Before you upgrade your ERP system, understand these common mistakes to avoid and your options for ERP reporting, analytics and planning tools.

### DATASHEET

#### Real-time Reporting for JD Edwards

Rather than relying heavily on IT, end users can create and manage their own ad hoc inquiries or reports. With the ability to view data at summary level or drill down into source transactions in real-time, the work done in disparate spreadsheets can be managed and updated in real-time, creating a single source of the truth. Version control and data integrity issues disappear, and processes like month-end close and report requests become more efficient.

### DATASHEET

#### ERP Analytics & Dashboards

With complete, real-time results in dashboards, you no longer have to troll through data to guess at what's happening in your business. It's easy to see the connection between results in the form of key performance indicators (KPIs) to the actual transactions support in real-time.
